## Additional advice on limit values

This mixture contains quartz (inorganic filler) which is firmly bound in the paste-like component and is therefore not freely available during use. The risk of dust inhalation is excluded. Exposure limits for respirable dusts are not relevant for this product.

## 8.2. Exposure controls

## Appropriate engineering controls

Provide adequate ventilation. If local exhaust ventilation is not possible or not sufficient, the entire working area must be ventilated by technical means.

## Individual protection measures, such as personal protective equipment

## Eye/face protection

Wear eye protection/face protection. Wear safety glasses.

## Hand protection

Disposable gloves  
Recommended material: NBR (Nitrile rubber)  
Breakthrough time: > 480 min  
Thickness of the glove material: > 0,2 mm  
DIN-/EN-Norms EN 374

When handling with chemical substances, protective gloves must be worn with the CE-label including the four control digits. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves.

## Skin protection

Wear suitable protective clothing.
